LAB VALIDATED

Schools face constant challenges with illness spread, odors, and maintaining healthy indoor air quality. MoldCure's dry-fog sanitization system treats air and surfaces simultaneously, reaching high ceilings, vents, carpets, cubbies, and hard-to-clean areas to reduce airborne contaminants and improve the learning environment.

WHAT MAKES MOLDCURE DIFFERENT

Whole-Room Coverage

Our dry fog fills each classroom like a vapor, reaching HVAC intakes, corners, and soft surfaces that manual cleaning can't access.

Fast & Non-Disruptive

Most classrooms can be treated in under 30 minutes. No residue. No moisture. No need to move furniture.

Scientifically Validated Technology

Hospital-grade disinfecting solution backed by independent GLP laboratory testing — complete kill of bacteria, mold spores, and fungi on porous and non-porous surfaces.

Safe for Students & Staff

Once the fog dissipates and the room is aerated, it's safe to re-enter. No harsh chemical odors or cleanup required.

Odor Elimination

Removes persistent odors from carpets, lockers, restrooms, and classrooms — improving the school experience for everyone.

BENEFITS FOR YOUR SCHOOL

- ✓ Reduces airborne pathogens and spores
- ✓ Helps limit illness spread among students and staff
- ✓ Enhances indoor air quality
- ✓ Supports custodial teams
- ✓ Eliminates odors at the source
- ✓ Creates a healthier learning environment
- ✓ Provides peace of mind for parents and staff

FLEXIBLE SERVICE PLANS

We offer sanitization memberships tailored to your school's size and needs. Our team will assess your facility and recommend the most effective schedule.
