LAB VALIDATED

Gyms and fitness centers battle odors, sweat, high-touch surfaces, and airborne contaminants every day. MoldCure's dry-fog sanitization system delivers whole-facility coverage that traditional cleaning can't reach — helping you create a cleaner, fresher environment that keeps members coming back. Our ultra-fine dry fog treats air and surfaces simultaneously, reaching locker rooms, weight rooms, turf areas, studios, and HVAC systems to reduce odors and improve air quality.

WHAT MAKES MOLDCURE DIFFERENT

Odor Elimination

Removes sweat, moisture, and locker-room odors at the source — not just masking them.

Whole-Facility Coverage

Our dry fog reaches high ceilings, equipment frames, mats, turf, and ventilation systems that are difficult or impossible to sanitize manually.

Fast & Non-Disruptive

Most gyms can be treated after hours in under an hour. No residue. No moisture. No downtime.

Scientifically Validated Technology

Hospital-grade disinfecting solution backed by independent GLP laboratory testing — complete kill of bacteria, mold spores, and fungi on porous and non-porous surfaces.

Safe for Members & Staff

Once the fog dissipates and the space is aerated, it's safe to re-enter. No harsh chemical smells.

BENEFITS FOR YOUR GYM

- ✓ Eliminates odors quickly
- ✓ Reduces airborne pathogens and spores
- ✓ Enhances member experience and retention
- ✓ Supports your cleaning staff
- ✓ Improves indoor air quality
- ✓ Helps differentiate your gym from competitors

FLEXIBLE SERVICE PLANS

We offer sanitization memberships tailored to your facility's size and traffic levels. Our team will assess your gym and recommend the most effective schedule.
